Protection through Innovation

**WELCOME
TO THE
WORLD
OF
TRUCK**

T RUCK & TRAIN

We are the world market leader in the production of technical textiles for truck tarpaulins and side curtains, (inflatable) containers, railway wagon tarpaulins, flat tarpaulins for vans, asphalt covers and roofs for truck.

Our standard range is unique and covers a vast variety of widths, weights, colours and aspects. In this brochure we describe 14 products in 147 colours and 9 widths all suited for truck and train applications.

OUR STRENGTHS = YOUR GUARANTEE

Our technical know-how

Our intensive R&D and expertise

Our team

The multilingual Sioen staff is known for its hands-on mentality. Besides being fast and cost-conscious, they always strive for a customized solution in a helpful and friendly way. Our customers always come in first place.

Our large product portfolio

We offer a large range of products, colours and widths.

Our state of the art production plants

Our financial health

We are part of a strong international stock quoted group, Sioen Industries nv. The solid structures and sound financial basis make us a reliable partner.

Our service

Speed,
performance,
diligence,
dedication

Our focus on solutions

Finding your tailor made solution is the result of interaction between our customers, our suppliers and our R&D team. Providing you with answers is the first step towards a solution.

Our product quality

- We stand for a high quality level.
- We continuously invest in new machines and equipment which gives us a competitive edge over the competition.
- Your feedback is an active source to further fine tune our qualities.

Our 50 years of experience

E XTRA CUSTOMER SUPPORT

We provide concepts and solutions

For every request we try to find the right solution. Together with our engineers, product managers, market specialists and researchers, we put a lot of effort in finding and producing the right product that fits your needs. The sales team is available from Monday until Friday from 8 until 18hours.

Tel: 0032 51/740.900 - e-mail: sioline@sioen.be

We offer support in product/ market development

Please feel free to contact us in case you wish to further explore new markets or develop new products. info@sioen.be

We offer marketing support

In the separate leaflet 'SUPPORT', you will find the complete overview of our sales support items: extra training, brochures and displays.

We provide training

At our Ardoorie headquarters, we boast a 8.000 m² showroom. It is the place to see new products, to get to meet the team and to make you more familiarised with the technicity of our products.

Apart from meeting again with your designated sales manager and appropriate sales assistant, it gives you the opportunity to become more acquainted with the Sioen people behind the scenes (quality, R&D, logistics, marketing,...).

**FROM
LIGHTWEIGHT TARPS
OVER TAR RESISTANT
MATERIAL
TO FR AND ANTISTATIC
FABRICS**

TARPAULINS

We offer a vast range of multi purpose flat tarpaulin material. From lightweight tarps to FR anti static and tar resistant. Some examples: tarps for containers, boats, tipping lorries, trailers,... Our standard range is unique and boasts a vast variety of widths, weights, colours and types. In addition, we can make tailor made fabrics produced according to your demands. Ask our skilled sales team for more information.

SIDE CURTAINS

Our B6000 panama range is very complete offering a large choice of widths and colours. Our standard range consists of 61 colours and 4 widths and are all stock delivered. This means fast service, quick delivery and excellent quality.

SIO SOLAR

The integration of flexible photovoltaic technology is yet another example of our R&D driven strategy. This new development enables you to generate your own green energy, ecofriendly and cost effective.

This new and revolutionary way of generating power can be integrated in tents, tensile constructions, rooftops, ...

For any additional information: info@sioen.be

SIOSTEEL

Siosteel is a composite consisting of a PVC coated steel net and double- side PVC coated polyester fabric, used primarily for intrusion-resistant truck and train tarpaulins and side curtains.

Discover the carapax concept

Carapax is a revolutionary patented concept:

- It is a composite material which consists of a diagonally woven aramide structure which is welded on the truck roof.
- Aramide, which has a succesful track record in aeronautics and military applications, is a light yet super strong material and will provide an unmatched resistance for the trailer superstructure.

The Carapax advantages

- The composite reinforced cover works like a carapax of a turtle over the trailer top.
- Complies to the EN 12642 XL regulation.
- Can be used in conjunction with a sliding roof.
- Operates quickly and safely: it prevents the driver from climbing onto the roof
- Maintenance free! No risk for elongation.

COATEX

AIRTUBE

Revolutionary de-icing system for truck roofs

One of the major risks in truck transportation is ice-formation on truck roofs. Falling off while departing, this can cause serious harm to vehicles and people in the immediate area of the truck.

We now offer the solution!

Easy

**Self
supporting**

**Risk
management**

By preventing water to stay on the roof, ice cannot be formed. The inflatable tube is built in the roof and can as easily be deflated whenever necessary. No ice, no risk, no climbing on the roof, ... in short, all risks are eliminated.

COATEX

SERVICE

Cutting

We provide any cutting and slitting services such as slitting standard sized rolls to your desired width. We equally slit coated textile strips for the reinforcement of side curtains and roofs.

Kadors

Over the years coatex has undoubtedly built an international reputation in kadors. The company offers both a standard range of products as well as the appropriate tailor made solution. Kadors are being used in conjunction with a coated textile and enables the user to slide the textile through a profile.

COATEX

GRAFFITI

DIRT

STOP

Sioen's dirt repelling lacquer formulation and anti-graffiti lacquer are both based on advanced polymer technology. The active substance in both formulations is a tailor-made graft-type acrylate copolymer with excellent surface properties. Both lacquers are two-component systems that can easily be formulated to their final application forms, being sprayable, solvent-borne, cross linkable, topcoat materials with excellent dirt repelling or anti-graffiti properties on PVC substrates.

SIOEN GRAFFITI STOP

SIOEN DIRT STOP

SIOEN
Graffiti
STOP

We present you SIOEN
GRAFFITI STOP.
An anti-graffiti coating that
prevents graffiti paints from
sticking on pvc surfaces.

Cleaning graffiti off buildings, statues, trailers, tents and other surfaces costs billions of Euros/ Dollars annually. Many cities have started anti-graffiti programs, however vandalism remains a major problem. We have succeeded in developing a coating which prevents taggers from vandalizing public and private properties. It is a clear coat sprayed on top of the existing paint or surface.

SIOEN GRAFFITI STOP protects PVC substrates against graffiti sprayers. Thanks to a protective layer, you can remove the graffiti in a trice. The graffiti disappears and it seems as if nothing happened. The product is being sold per 10kg and can be sprayed for instance on a finished side curtain.

SIOEN DIRT STOP is a clear lacquer which is dirt-repellent and applicable on any surface. Imagine a tent, tensioned structure, truck tarpaulin or side curtain to be cleaner and brighter for a much longer period in time. The chemical composition of the topcoat guarantees an excellent dirt repellency, and enhances the cleaning properties significantly, giving any surface excellent cleaning and even self-cleaning properties (dirt repellence).

Packaging:

Both lacquers are available in 10 kg
packing, each consisting of 9.75 kg of
component A and 0.25 kg of component B.
